Project 4 Roadmap - OG Programmers

Final Submission: 2017/4/11

Description:
    Expand the Havabol interpreter to handle the following:
    - arrays
    - complex expressions
    - other built-in functions
    - for loops
    - expanded String functionality

Milestone 1: Sunday, April 2, 2017
Elijah:
    - array assignments
        ● scalars and arrays may be sources

Nick:
    - complex/mixed expressions (no array element support)

Jake:
    - for loops using Strings and counters

Milestone 2: Sunday, April 9, 2017
Elijah:
    - built-in functions
    -
Nick:
    - expressions involving array elements
    -
Nick:
    - for loops using array elements
